WEB TECHNOLOGY
ASSIGNMENT 1

Task 1:

Steps of creating a GIT repository named as your enrollment number. Create 2 folder inyour repository named as Assignment_1 and Assignment_2.
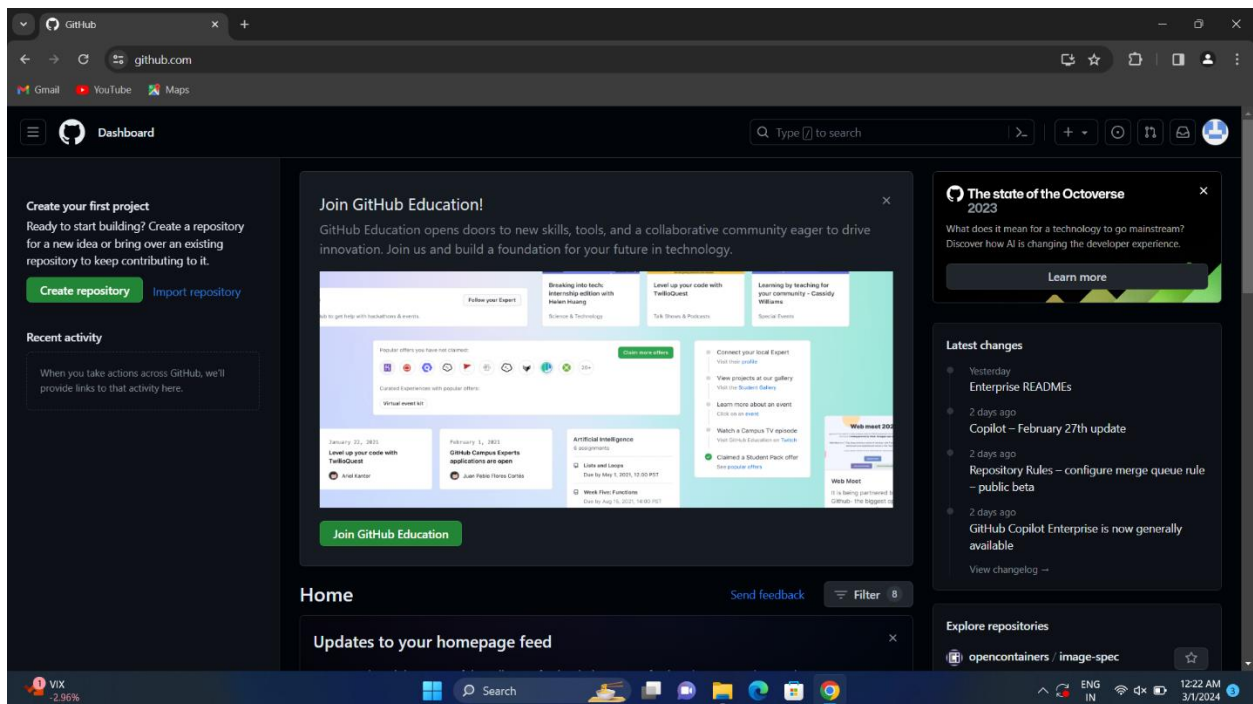

STEP-1:

Go to :- https://github.com.

STEP-2:

Sign up (create a new account)

Log in (if your account already exist) with your email address.
.

STEP-3:

A Homepage will appear as shown below & Click the top right corner:-
.

## Step-4:

Go to "**Your profile**".

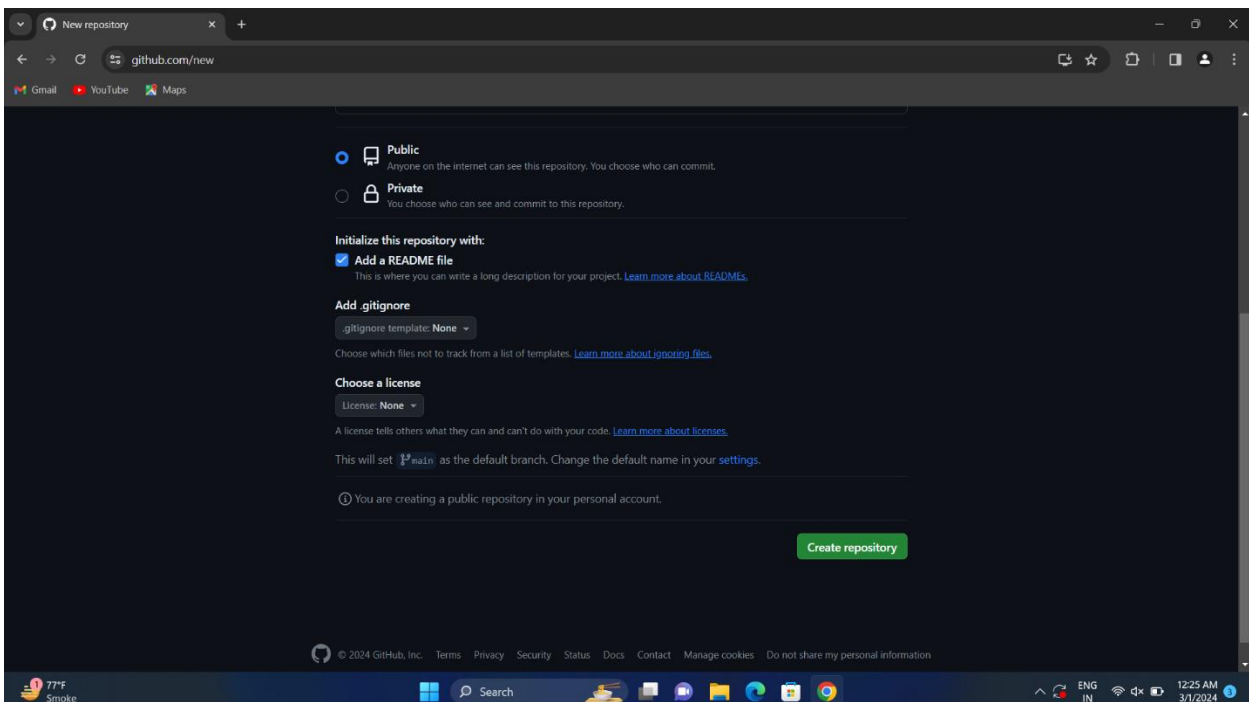

Step-5:

select "New" to make your repository.

Step 6: Enter your repository name (here I entered my enrollment no.-

2201030400181). Write a description about your repository (which is an optional step). Select "Public"

Step-7:

Scroll and select the checkbox "read me file" and click "Create repository"
Step-8:

Finally you have successfully created your repository (2201030400181).

Now let's create the folders named Assignment_1 and Assignment_2 in our created repository. For creating the folder, click "add file" then a drop down menu will appear,there click "create new file".

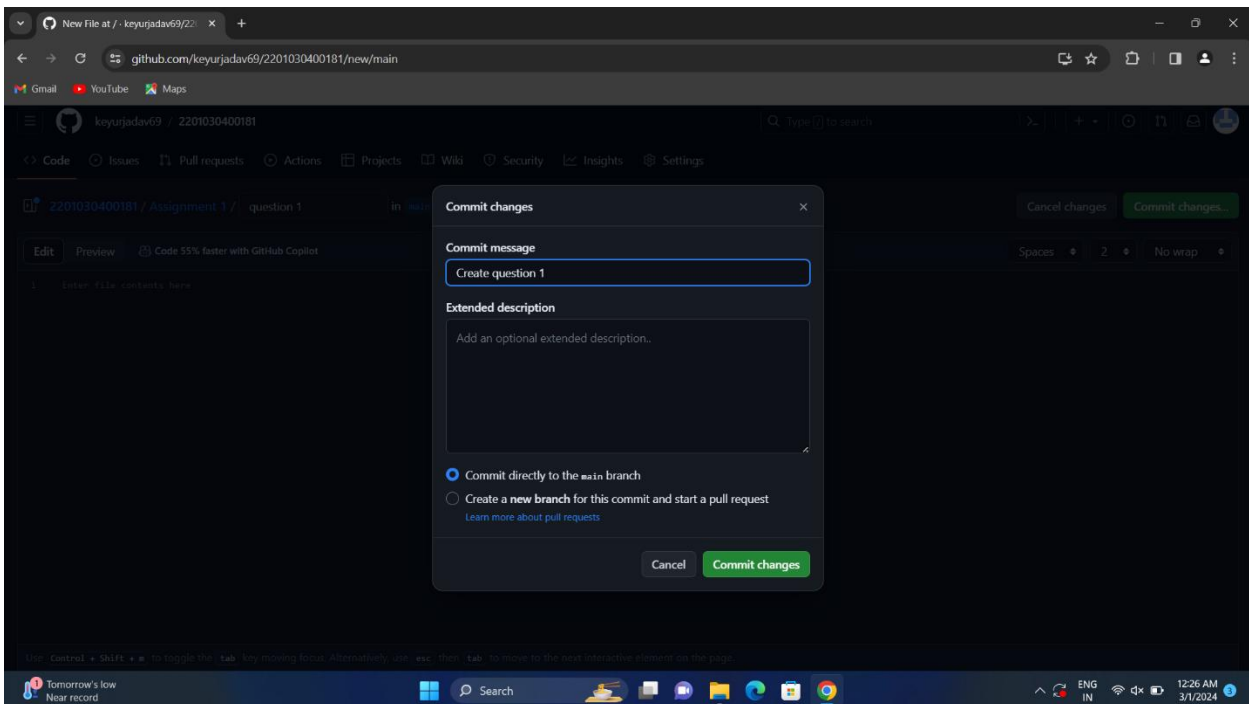

Step-9:

Enter your first folder name (Assignment_1), press "/" , enter your document file name andclick "commit changes".

When you click "commit changes", a commit message appears, also a text box named "extended description" appears where you can describe your changes in detail (which is again optional). Click "commit changes

And so, your first folder named assignment_1 has been created in your repository. Follow the same steps and create the second folder named assignment_2 in the same repository (2201030400181).

Now, both the folders (Assignment_1, Assignment_2) have been successfully created in your repository (2201030400181).

Finally your repository should look like the image shown below:-
